ENERGY LITERACY

An energy-literate person:

- Can trace energy flows and think in terms of energy systems.
- Knows how much energy they use, for what purpose, and where the energy comes from.
- Can assess the credibility of information about energy.

AK ENERGY
SMART

ENERGY LITERACY

An energy-literate person:

- Can communicate about energy and energy use in meaningful ways.
- Is able to make informed energy use decisions based on an understanding of impacts and consequences.

Source: USDOE

Energy Literacy Principles

1

Energy is a physical quantity that follows precise natural laws.

2

Physical processes on Earth are the result of energy flow through the Earth system

3

Biological Processes depend on energy flow through the Earth System

4

Various sources of energy can be used to power human activities, and often this energy must be transferred from source to destination.

5

Energy decisions are influenced by economic, political, environmental, and social factors.

6

The amount of energy used by human society depends on many factors.

7

The quality of life of individuals and societies is affected by energy choices.

AK ENERGY

AK ENERGYSMART

ALASKA'S K-12 ENERGY EFFICIENCY CURRICULUM

- Funded by the Alaska Housing Finance Corporation (AHFC) in 2011-2012, 2014-2015; developed by the Alaska Center for Energy and Power (ACEP) and Renewable Energy Alaska Project (REAP)
- Content reviewers:
 - Cold Climate Housing Research Center
 - Alaska Native Knowledge Network
 - Juneau Economic Development Council's STEM Program
 - Pilot teachers from around the state

AK ENERGY
SMART

- **Purpose:** give Alaskan youth a better awareness of how they use energy and the importance of taking measures to use energy wisely both at home and school
- Alaska-specific; designed with Alaska's unique cultures, environments, and energy challenges in mind
- 23 lessons from Kindergarten to Grade 12

AK ENERGY
SMART

- **What are various forms and sources of energy?**
- **How do we use energy?** What various energy efficiency options are available?
- **Why should we care about energy efficiency?** How can demand side energy efficiency and conservation and generation side energy efficiency reduce overall energy consumption and why is that important?
- **What direct steps can I take in my school and home to lower consumption?**

AK ENERGY
SMART

- **Standards Alignments:**
 - Alaska English Language Arts and Mathematics Standards
 - Next Generation Science Standards
 - Alaska Science Grade Level Expectations
 - Alaska Cultural Standards
 - Alaska Technology Standards

AK ENERGY
SMART

WHAT WE OFFER

- Access to AKES lessons
- Teacher trainings in hub communities
- Classroom visits to model the curriculum
- Free kits including Kill-A-Watt meters and other supplies that support the curriculum mailed anywhere in AK

AK ENERGY
SMART

- Educator workshops and classroom visits around the state

Classroom visit in Anchorage

Teacher workshop in Fairbanks

Classroom visit in Kokhanok

Renewable Energy
Alaska Project

AK ENERGY
SMART

- “I appreciate the AK focus; this is not often seen in energy curriculum yet we have some specific challenges to address.” – Alaskan educator
- “I like that the lessons are appropriate for our students, and the age group I'm teaching, easily adaptable, and can lead to other energy topics.” – Alaskan educator
- “I found the lesson on building your own home particularly useful. I feel it would be interesting to see kids’ reactions when they realize how much energy they go through.” – Alaskan educator
- “More teachers should be utilizing this curriculum and resources. Students should be learning about this NOW!” – Alaskan educator
